

ARCS 6.0 Minimum Hardware Specifications

Panel Management Only

SQL Server Specs:

Software: SQL Server 2008

Processor: 2.4 GHz or faster

Memory: 2 GB RAM minimum

Hard Disk requirements: 250 GB min

ARCS Client Machine Specs:

Processor speed: 2.0 GHz or faster

Memory: 1 GB RAM minimum

Panel Management and IVR

SQL Server Specs:

Software: SQL Server 2008

Processor: 2.4 GHz or faster

Memory: 2 GB RAM minimum

Hard Disk requirements: 250 GB min

IVR Server Specs:

Processor speed: 2.4 GHz or faster

Memory: 2-4 GB RAM

Hard Disk requirements: 120 GB min

ARCS Client Machine Specs:

Processor speed: 2.0 GHz or faster

Memory: 1 GB RAM minimum

Panel Management and Web

SQL Server Specs:

Software: SQL Server 2008

Processor: 2.4 GHz or faster

Memory: 2 GB RAM minimum

Hard Disk requirements: 250 GB min

Internet/Intranet Web Server Specs:

Processor speed: 2.4 GHz or faster

Memory: 2 GB RAM minimum

Web Services/COM Server Specs:

Processor speed: 2.4 GHz or faster

Memory: 2 GB RAM minimum

ARCS Client Machine Specs:

Processor speed: 2.0 GHz or faster

Memory: 1 GB RAM minimum

* While it is recommended that each module runs on its own server, depending on the size of the installation and security guidelines some processes can run on the same server.
